## Professional Experience

### Since May 2020 **Managing Director and Founder of Alltimm GmbH - The Pharma Startup Paradise**

With my consultancy company I build-on my hands-on experience with creating Actelion's technical operations and global supply chain. My clients are passionate about bringing innovative pharma ideas and products to patients. I invest all my know-how covering early startup to global pharma organizations.

### Febr. 2009 - July 2021 **'Quality & Production' lecturer in Master of Pharmaceutical Sciences at ETH Zuerich University**

Teaching master students in the area of quality management and production and lecturer in courses of the ETH.

### July 2019 - April 2020 **Janssen Global Technical Operations, Program Implementation**

Team lead to implement an end-to-end lead role in the global Technical Operations function

### July 2006 - June 2019 **Vice President, Head of Technical Operations, Actelion Pharmac. Ltd., Switzerland**

- Worldwide supply chain management for product sales of \$US 2.6 billion in more than 50 markets
- Lean high quality outsourcing strategy with low cost of goods
- Global supplies for several orphan drugs with two products reaching yearly sales of more than 1 billion Swiss Francs
- Actelion's pilot plant for solid dosage form manufacturing was part of my department.
- Management of Actelion's clinical supply chain for multiple early and pivotal worldwide clinical studies
- Team spirit with high empowerment of up to 65 experts in the complete commercial and clinical supply chains

### July 2000 - June 2006 **Director, Head of Production & Technical Development at Actelion Pharmac. Ltd., Switzerland**

- Approval and launch of Actelion's first two products: Tracleer & Zavesca
- Team build-up and pilot plant operations for clinical supplies
- Supplier network for end-to-end clinical and commercial supply chain

### Jan. 1998 - June 2000 **Technical Project Leader and Lab Head for Sterile Dosage Forms at Novartis AG, Switzerland**

Development of clinical formulations for peptides, proteins, and low soluble compounds for international project teams. We explored innovative technologies like nano-suspensions and solubilization.

### 1996 - 1997 **Pilot Plant Manager for Solid Dosage Forms at Arzneimittelwerk Dresden GmbH, Germany**

### 1995 - 1996 **Research & Development Trainee at Asta Medica AG, Frankfurt, Germany**
